Orig. Code(s): EBBAA/GBEBC/JHCCC

Infection Control - HIV, AIDS, HBV

The district shall use standard precautions at all times for infection control. Each staff member or student is therefore treated as though an HIV, AIDS or HBV¹ infection exists.

The district shall develop an Exposure Control Plan that includes infection control procedures for staff and students.

All district employees shall receive an annual in-service session relative to infection control. This in-service shall focus on required procedures and precautions relevant to particular position duties.

In addition to an annual in-service, staff and students on a regular basis will receive HIV, AIDS, and HBV information.

The information shall emphasize infection-how infection is spread as well as how it is not spread.

The district will cooperate with the local health department in delivering HIV, AIDS and HBV education.

Resources for infection control shall include:

1. Emergency kits in all rooms/areas and vehicles;
2. Personal protective equipment (PPE) kits in specific locations for use by designated first-aid providers;
3. First-aid kits in health rooms and other specific locations such as gyms, shops, cafeterias and science rooms;
4. Necessary custodial supplies for proper fluid clean-up and for handling of contaminated items.

END OF POLICY
