Drug, Alcohol and Tobacco Prevention, Health Education**

Students have a right to attend school in an environment conducive to learning. Since alcohol, drug and tobacco use is illegal and interferes with both effective learning and the healthy development of students and adolescents, the school has a fundamental legal and ethical obligation to prevent drug use and to maintain drug-free educational environments.

After consulting with parents, teachers, school administrators, local community agencies and persons from the health or alcohol and drug service community who are knowledgeable of the latest research information, the Board will approve a drug and alcohol prevention and intervention program.

Drug Prevention Program

The district will annually review and update as needed an age-appropriate alcohol/drug/tobacco prevention curriculum to be taught annually to all students K-12.

Instruction in the effects of tobacco, alcohol, drugs, including anabolic steroids performance enhancing and controlled substances will be integrated in the districts' K-12 comprehensive school health education program. Students not enrolled in health education shall receive alcohol/drug prevention instruction through other designated courses in grades 9, 10, 11 and 12.

Instruction shall meet the requirements set forth in the Oregon Administrative Rule as it pertains to prevention education programs in alcohol and drugs.

The district will include information regarding the district's intervention and referral procedures, including those for drug-related medical emergencies in student/parent and staff handbooks.

Intervention is defined as the identification and referral of students whose behavior is interfering with their potential success socially, emotionally, physiologically, and/or legally as a result of prohibited drug, alcohol and/or tobacco use.

Any staff member who has reason to suspect a student is in possession of, or under the influence of unlawful drugs, alcohol, other intoxicants or tobacco on district property, on a school bus or while participating in any district-sponsored activity, whether on district property or at sites off district property, will escort the student to the office or designated area and will report the information to the principal or his/her designated representative.

Students possessing, using and/or selling unlawful drugs, including drug paraphernalia, alcohol and tobacco on district property, in district vehicles, at district-sponsored activities on or off district grounds shall be subject to discipline up to and including expulsion. When considering disciplinary action for a child with disabilities, the district must follow the requirements of Board policy JGDA/JGEA – Discipline of Students with Disabilities including those involving functional behavioral assessment, change or

placement, manifestation determination and an interim alternative educational setting. Students may also be referred to law enforcement officials.

In general, drug-related medical emergencies will be handled like a serious accident or illness. Immediate notification of the community emergency care unit is required. Trained staff members will assist the student in any way possible. Parents shall be contacted immediately. A staff member shall be designated to accompany the student to the hospital or emergency medical facility. Procedures to be taken, including those for students participating in district-sponsored activities off district grounds, shall be included in the district's comprehensive first aid/emergency plan.

The district will actively seek funds from outside sources either independently or through coordinated efforts with other districts, community agencies or the education service district for drug-free schools grants.

A planned staff development program that addresses the instructional needs and responsibilities for the entire staff will be developed by the district. The input of staff, parents and the community is encouraged to ensure a drug, alcohol and tobacco staff development program that best meets the needs of district students.

Staff development will include current basic alcohol, tobacco and other drug information and an explanation of district and school alcohol, tobacco and other drug policies, procedures and program.

The district will develop a public information plan for students, staff and parents.

The district's Drug, Alcohol and Tobacco Prevention, Health Education policy, related policies, rules and procedures will be reviewed annually and updated as needed.

END OF POLICY
